01 · ABOUT THE FIRM

Engineering that **moves the needle.**

Omiksa Associates is a Delhi-headquartered engineering and IT consulting firm serving enterprises across India and the GCC. We architect and ship AI-native platforms, distributed systems, and mission-critical software — delivered by principal-led teams with decade-plus hands-on experience. From core banking modernization to GenAI customer service platforms, we engineer software that actually changes how businesses operate.

Driven by a culture of excellence and innovation, we don't just deliver IT — we empower growth.

02 · OUR PROMISE

Make your business simpler with one trusted engineering partner.

01 OUR VISION

To power businesses with bold, AI-native technology solutions that drive rapid growth and lasting success across regulated and ambitious industries.

02 OUR MISSION

To empower clients with innovative, principal-led technology engagements that drive measurable success — built on trust, transparency, and lasting partnerships.

03 OUR PURPOSE

We combine deep expertise in AI engineering, distributed systems, BFSI transformation, and ERP implementations with a customer-first approach to deliver tailored solutions that truly address your business challenges.

03 · SIX PRACTICE AREAS

Senior-led engineering, end to end.

Each engagement is led by practitioners with a decade-plus of hands-on experience. No junior handoffs. This is how we ship systems your business can bet on.

PRACTICE / 01

Frontend Engineering.

- Architecture & micro-frontends
- SSR / CSR · performance · SEO
- AI-powered frontends · RAG · GPT
- Scalable UI & team leadership

PRACTICE / 02

Distributed Systems & Backend.

- Event-driven architecture
- High-scale backend engineering
- AI / LLM pipelines · financial integrations
- DevOps · performance · security

PRACTICE / 03

Full-Stack Delivery.

- End-to-end product delivery
- Agile SDLC ownership
- Cloud deployment & architecture
- AI-enabled applications

PRACTICE / 04

Enterprise Architecture.

- Enterprise architecture & leadership
- Serverless & microservices systems
- CI / CD · DevOps · cloud transformation
- Stakeholder management & delivery

PRACTICE / 05

AI / ML & GenAI.

- GenAI product strategy
- End-to-end product lifecycle
- Customer personalization & automation
- Bridging business & technology

PRACTICE / 06

BFSI Transformation.

- Core banking modernization
- Risk & compliance automation
- Process automation & financial data
- Enterprise architecture leadership

Zoho

Odoo

SAP

The minds behind **the work.**

Strategic minds powering business innovation. Senior practitioners who own outcomes — not just deliverables. Each engagement is led directly by these principals; no layered handoffs, no anonymized account managers between you and the people building.

Shubham Goel

FOUNDER · TECHNOLOGY EVANGELIST

Shubham founded Omiksa Associates with a clear conviction: that ambitious enterprises deserve senior-grade engineering, not junior handoffs. He sets the firm's strategy across AI/ML, distributed systems, and BFSI transformation, and personally leads engagements where the stakes are highest.

Mitali Kohli

HEAD OF DESIGN

Mitali leads design at Omiksa, shaping how clients experience the firm's work — from product UI to brand systems to client-facing collateral. She brings a user-centered, calm-tech approach to every engagement, ensuring software ships not only correct and scalable but also beautiful and intentional in its details.

Three reasons to **work with us.**

01 **Principal-led expertise**

We combine deep expertise in AI engineering, distributed systems, BFSI transformation, and ERP implementations with a customer-first approach. Every engagement is led by senior practitioners with a decade-plus of hands-on delivery — no junior handoffs.

02 **Customer-first delivery**

From initial consultancy and solution design to seamless implementation and ongoing support, we manage the entire project lifecycle with transparency and collaboration. You'll meet the exact people building your systems before the engagement starts.

03 **Enterprise-grade security & compliance**

We operate under your compliance framework with technical and organizational measures tailored to regulated industries — including background checks, data-residency requirements, and zero-trust architectures. Built for BFSI from day one.

Let's architect your **next system.**

A 30-minute consult with a senior architect. We'll map your current architecture, identify the highest-leverage moves, and tell you honestly what's worth building. No pitch deck.
